

PRODUCT DESCRIPTION

AIR-board[®] ECO PC clear honeycomb panels are made with two polycarbonate (PC) core options and clear PC facing sheets with sustainable raw material content. PC ECO is the facing layers and has a bio-circular material content and low CO2 footprint. Normally manufactured using fossil fuels, these components have been replaced by bio-based renewable raw materials. The attributed share is up to 83% of the total material content. In addition, **AIR-board ECO PC clear** is 100% recyclable. These lightweight panels combined with two different core options can be used in many different ways in interior architecture to suit the needs of your design.

POPULAR APPLICATIONS

INFINITE POSSIBILITIES

Moxie Surfaces is the US Distributor of Design Composite. We specialize in creative finishing materials with infinite possibilities. Our unique architectural elements stimulate the senses and help create beautiful environments for learning, living, and enjoying our lives.

Our products provide a variety of benefits including sound absorption, light transmission and thermal insulation, while offering unlimited applications for indoor or outdoor design.
